DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Williamson et al.

Williamson et al disclose a regenerative amplifier system comprising: mirrors (50 and 52) defining a resonant cavity; means (46) for providing an input pulse; a first Pockels cell (54) adjacent the first mirror; a second Pockels cell adjacent the second mirror; and means (S1 and S2) for controlling the polarization state of the Pockels cells via an applied voltage. This structure reads on claims 1-10.

Claims 11-15 are allowed.

The limitation- recited by claims 11-15- of first and second polarizers respectively provided between the first and second Pockels cells and the amplifying portion is not taught or suggested by Williamson et al.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller et al discloses structure similar to applicant's admitted prior art.
